

A detailed industrial scene featuring a robotic welding system. On the left, a large orange and black KEMPPi wire feeder is visible. In the center, a robotic arm with a blue and black body is positioned, holding a long, flexible wire feed hose that extends towards the bottom left. The hose is connected to a welding torch, which is actively welding a metal piece, creating a bright, intense light. The background shows various industrial components, including a large blue barrel and a control panel with a digital display. The overall environment is dark, emphasizing the bright light from the welding process.

ASSISTIVE WIRE FEEDER

RA50 4R assistive wire feeder enables long distance wire feeding from barrel or spool in robotic welding.

Easy to install

Due to automatic adaptive wire push force control (AMC™) there's no need for calibration or adjustment, just plug in the feeder and start welding.

Increases durability

Assistive wire feeder takes much of the load off the main wire feeder increasing its durability and reducing feeding problems.

For long distances

RA50 4R allows the wire to be fed over distances of up to 50m. Must have product for the gantry welding systems.

Product code	Description
RX2215025	RA50 4R Assistive Wire Feeder (+bracket)
W028663	Wire Liner AL, SS /20 M Ø 5,3/2,5 CHILI
W028664	Wire Liner AL, SS /30,5 M Ø 5,3/2,5 CHILI
6185700	Cable Splitter 7-PIN
61854851	Robot Control Cable 10m
61854853	Robot Control Cable 20m
SP600535	Wire Conduit-1.8m Robot
SP600782	Wire Conduit Cable-20.0m Robot
SP600783	Wire Conduit Cable-30.0m Robot
W005197	Male Connector For Wire Conduit

For all welding wire materials and recommended to use if wire conduit length is 10m or longer. Compatible with AX Mig Welder systems.
