

GXe-C THE COBOT TORCH WITH THE KEMPPPI TOUCH

The GXe-C torch makes Kemppi precision, reliability and durability available for cobot solutions at the push of a button.

Press and weld

Quick to integrate with your cobot solution, and simple to operate with accessible push-buttons. The Series 5 features three buttons that give the welder direct control of the wire feeder, gas test and trigger functions.

Built to keep up with your cobot

Based on the popular GXe torch and engineered to endure the demands of welding with cobots. The GXe-C minimizes maintenance and guarantees productivity and cost-efficiency.

Greater accuracy

Our uniquely adjustable bracket makes it easier to achieve and secure the optimum torch position, keeping the TCP accurate. The bracket can be rotated by 5° increments, with linear adjustment at the base.

Which model?

GXe-C is available in water- and gas-cooled models.

Series 5 for your full Kemppi cobot solution.

Series 3 for compability with other brands of power source.
